## NeasureOD® The Laser/Optical Micrometer Measurement Software

The MeasureOD® System is the software platform that provides tools and information for every User of the data generated by your Laser or Optical Micrometer hardware systems. The SOFTWARE provides the following features:

• Provides a uniform User Interface regardless of the connecting measurement hardware

• Time Domain Graphical results of the measurements (Global and Local)

• Real time Statistical Analysis of the Measurements (Global and Local)

 Exporting of the measurements to Microsoft Excel in a "Ready to Print Format"

 Directly supports RT Automation Tower Light System. Just plug it in and the software will automatically recognize that it is connected

#### Experience-based design

 Developed and designed by a team that has over thirty years of experience in Mechatronics/DAQ/automation/software field Provides Uniform User Interface independent of connected Laser Micrometer System

#### Low Cost of Implementation.

 Runs on Windows XP/7/10 environment – eliminates the need for proprietary (expensive) workstation/hardware

 Single, competitive purchase price with no periodic subscription costs Low-cost communication cabling

#### Robust, Validated Software

 Designed to run for days/months/years - 24/7 operation w/ no software issues • Proven track record at a medical device manufacturing firm

#### Multi-Platform Control / Standard Interface

• Supports multiple laser micrometer products • Includes single, double, tri-axis measurement planes

• Updates to the software implemented at no charge to support any Laser Micrometer system
